

(SDS). It also requires manufacturers, processors, or distributors in commerce (except for retailers) to retain methylene chloride in one location at the headquarters of the company, or the facility for which the records were generated, documentation showing: (i) The name, address, contact, and telephone number of companies to whom methylene chloride was shipped; (ii) a copy of the notification provided to companies to whom the methylene chloride was shipped; and (iii) the amount of methylene chloride shipped. This information must be retained for three years from the date of shipment. EPA established these requirements under TSCA Section 6(a) in response to a final determination that the consumer use of paint and coating removal presents an unreasonable risk of injury to health. This ICR consists of the downstream notification of the prohibitions and the recordkeeping requirement.

Form Numbers: None.

Respondents/affected Entities:

Respondents affected by this activity may include those that engage in the manufacture, processing and distribution in commerce of methylene chloride for consumer paint and coating removal. The ICR provides a list of the North American Industrial Classification System codes that might apply to entities that may be affected by the activities described in this ICR.

Respondent's obligation to respond: Mandatory per 40 CFR 751 and TSCA section 6(a).

Frequency of response: On occasion.

Estimated number of potential respondents: 14 (total).

Total Estimated burden: 7 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$298 (per year), which includes no annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease in the estimated total annual burden and costs compared with that identified in the ICR currently approved by OMB. Burden decreased from 69 hours to 7 hours. This decrease is due a decrease in the number of respondents.

Courtney Kerwin,

Director, Regulatory Support Division, Office of Mission Support.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for the Surface Coating of Large Household and Commercial Appliances (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), "NESHAP for the Surface Coating of Large Household and Commercial Appliances (EPA ICR Number 1954.10, OMB Control Number 2060-0457), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through May 31, 2022. Public comments were previously requested, via the **Federal Register**, on April 13, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before June 27, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2021-0098, to EPA online using <https://www.regulations.gov/> (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information

collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov>, or in person, at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: Owners and operators of large household and commercial appliance surface coating facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the applicable specific standards in 40 CFR part 63 subpart NNNN. This includes submitting initial notifications, performance tests and periodic reports and results, maintaining records of materials usage, and any period during which the add-on control system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: 5900-564.

Respondents/affected entities:

Existing and new facilities that perform surface coating of large household and commercial appliances.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart NNNN).

Estimated number of respondents: 10 (total).

Frequency of response: Initially, semiannually.

Total estimated burden: 4,380 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$524,000 (per year), which includes \$6,350 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This ICR

incorporates the incremental burden from recent amendments to the rule as part of a Risk and Technology Review (RTR) in July 8, 2020 (85 FR 41100). The prior RTR amendments removed the excess emission and SSM reporting requirements, resulting in a small decrease in burden hours. The prior RTR amendments also adjusted an error in the previously approved ICR and corrected the burden hours to record and disclose information to two hours per week, which is reflected in this ICR as an increase in burden. The growth rate for this industry is non-existent, with no new respondents expected.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Polyvinyl Chloride and Copolymers Production Area Sources (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Polyvinyl Chloride and Copolymers Production Area Sources (EPA ICR Number 2454.05, OMB Control Number 2060–0684), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through May 31, 2022. Public comments were previously requested via the **Federal Register** (86 FR 19256) on April 13, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Polyvinyl Chloride and Copolymers Production Area Sources (40 CFR part 63, subpart DDDDDD) apply to existing facilities and new PVC and copolymer production facilities that are an area source of hazardous air pollutants (HAP). This ICR includes burden estimates for area sources only. Major sources are regulated under NESHAP Subpart HHHHHHH and their burdens are included in a separate ICR (OMB Control Number 2060–0666). New facilities include those that either commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications,

performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to the NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart DDDDDD.

Form Numbers: None.

Respondents/affected entities:

Polyvinyl chloride and copolymer production area source facilities.

Respondent's obligation to respond: Mandatory (40 CFR 63, Subpart DDDDDD).

Estimated number of respondents: 3 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 73,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$9,670,000 (per year), which includes \$1,000,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The decrease in burden from the most-recently approved ICR is due to three adjustments. There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. The adjustment decrease in burden from the most-recently approved ICR is due to a decrease in the number of respondents. The most-recently approved ICR estimated 4 area source facilities; however, one facility has ceased operations, as reflected in the ICR for the most recent proposed rule (85 FR 71490, November 9, 2020), which was previously submitted to OMB for approval. Therefore, this ICR renewal considers there to be 3 area source facilities.

The adjustment decrease is offset by corrections to burden estimates for resin sampling, PRD electronic monitor review, gasholders, storage vessels, and ongoing inspections of bypasses and to the number of occurrences per year for recordkeeping requirements to more accurately reflect facility activities as shown in Table 1: Annual Respondent Burden and Cost—NESHAP for Polyvinyl Chloride and Copolymers Production Area Sources (40 CFR part 63, subpart DDDDDD) (Renewal).

There is a decrease in the operation and maintenance (O&M) costs as calculated in section 6(b)(iii) compared
